HPE Synergy Administration with HPE OneView Training

Duration: **3 Day**

BILGINC IT Academy
info@bilginc.com
bilginc.com

This course provides instruction on HPE Synergy configuration, administration, management, troubleshooting and maintenance. This hands-on course covers day-to-day administration skills on HPE Synergy Composer, storage module, compute modules, frame management, fabric connectivity, multi-frame domains and server profile management. Students also learn about HPE Global Dashboard features.

Audience

• System administrators, engineers and consultants who install, manage, and monitor HPE Synergy systems

• New HPE Synergy customers or HPE BladeSystem c-Class customers interested in HPE Synergy

Prerequisites

Basic networking and HPE OneView experience is strongly recommended, or complete the following courses:

• H0LN2AAE HPE Synergy Overview WBT

• H0LP6AAE HPE OneView Overview and Configuration for Synergy

What You Will Learn

- Introduce Composable Infrastructure (basic concepts) and HPE Synergy domains
- Explore the functional architecture of the HPE Synergy environment, including management infrastructure (HPE Synergy Composer, HPE synergy Image Streamer, Frame Link Modules), compute modules, interconnect modules, local storage systems, power and cooling
- Review the HPE Synergy Portfolio and equipment capabilities
- Explain the HPE Synergy Master/Satellite interconnects topology and cabling
