The **SAP Builder Day | Low-Code Development with SAP Build (WLCNCD)** training course is designed for professionals who want to accelerate application development, extend existing applications and automate business processes without writing code.

Using SAP's **low-code development tools**, participants will discover how to automate repetitive tasks, create applications and design business sites that simplify everyday activities while supporting organisational agility and innovation.

During this one-day, hands-on training course, participants will explore the fundamentals of low-code software development, create a complete end-to-end business process and integrate it with **SAP S/4HANA**.

The course combines practical exercises with an introduction to the key solutions within the SAP Build portfolio: **SAP Build Apps, SAP Build Process Automation and SAP Build Work Zone** .

Prerequisites

Participants should have the following foundational knowledge and experience before attending the course:

- Basic knowledge of SAP solutions and a general technical understanding
- General expertise in the business rules and processes relevant to their specific domain or line of business

Who Should Attend

This course is intended for professionals interested in using**low-code and no-code development tools** to improve business processes, build applications and encourage innovation within their organisations.

- Application, technology and development consultants
- Key users
- Business analysts
- Business process architects
- Business process owners
- Project managers
