Duration: **1 Day**

What You Will Learn

By the end of the training, participants will be able to:

- Identify **COBIT's target audiences and stakeholders** and explain its role in supporting the **governance and management of enterprise information and technology (I&T)** .
- Examine the **COBIT portfolio** and understand how it aligns with other **frameworks, standards, and bodies of knowledge**.
- Distinguish between **governance system principles** and **governance framework principles**, and recognize the essential **components of a COBIT governance system**.
- Explain the differences between **governance and management** and understand how COBIT structures its **40 governance and management objectives** across the **EDM, APO, BAI, DSS, and MEA** domains.
- Compare COBIT's **board-level, high-level, and detailed assessment** approaches and distinguish the associated **maturity, achievement, and capability** perspectives.
- Describe how **design factors** are applied to **customize and prioritize an enterprise governance system** according to organizational requirements.
- Enhance their knowledge through **official ISACA learning content** and earn **7 CPE credits** upon completing the training.
