Overview

An **Occupational Health and Safety Management System (OH&S MS)** is a critical framework for improving workplace safety, reducing risk, and protecting the well-being of employees.
An effective internal audit ensures that this system operates efficiently and continues to improve performance.

This **2-day Internal Auditor Training Course** equips participants with the knowledge and skills required to **plan, conduct, and report internal audits** based on **ISO 45001:2018**.
You will learn how to assess the conformance and implementation of OH&S processes, initiate audit programs, evaluate compliance, and provide actionable feedback to enhance your organization's safety performance.

By the end of the course, you'll be able to perform internal audits that not only ensure compliance but also drive continuous improvement in occupational health and safety management.

Key Benefits

Benefit	Description
Comprehensive Knowledge	Learn ISO 45001 internal auditing principles and techniques
Practical Experience	Gain hands-on skills for conducting effective internal audits
Performance Improvement	Identify opportunities to improve safety and compliance
Global Standard Alignment	Build competence based on ISO 19011 and ISO 45001 best practices
