NetApp Storage System Recovery & Troubleshooting Training

Duration: **4 Day**

BİLGİNÇ IT Academy
info@bilginc.com
bilginc.com

In this course, you learn about the recovery of offline systems. You learn some of the reasons that systems go offline, including hardware causes and extraordinary circumstances. You also learn about data inconsistency issues and how to resolve the issues. This course does not cover platform-specific content.

Prerequisites

- Level 1 Partner Training
- Clustered Data ONTAP Administration
- A minimum of six months' familiarity with supporting current NetApp hardware

What You Will Learn

- Bring a hard-down system online, with data intact
- Eliminate repeat system panics and boot loops on problematic systems
- Restore stability to unstable customer environments
- Identify irregularities in the storage controller boot sequence
- Demonstrate the steps required to perform a nondisruptive upgrade
- Create an action plan to resolve hardware issues
- Demonstrate the steps used to recover a deleted volume
- Demonstrate the steps to create a new root aggregate
- Describe the differences between wafliron and wafliron –o
- Explain how to use the WAFL recovery tools
