**PECB Certified Lead SOC 2 Analyst Training** is designed to provide participants with the knowledge and practical understanding needed to plan, implement, manage, and continuously improve organizational compliance programs aligned with the **SOC 2 framework**.

The course takes a comprehensive approach to **SOC 2 assurance and compliance activities**. Participants explore the **Trust Services Criteria (TSC)** and learn how organizations can plan, implement, and evaluate security controls related to their information systems.

The program addresses **risk management**, **gap analysis**, **policy and procedure development**, **security control implementation**, **incident response**, **business continuity**, **disaster recovery**, **audit readiness**, and **reporting**.

Participants also examine methods for monitoring and improving SOC 2 compliance activities, developing the skills needed to contribute to organizational **audit preparation** and ongoing compliance management.

In addition, this training supports preparation for the subject areas covered by the**PECB Certified Lead SOC 2 Analyst** certification examination.

## Prerequisites
