Overview

This course provides practical experience using AI tools to support product planning activities such as roadmap creation, backlog prioritization, and release planning. Learners will understand how AI can improve speed, clarity, and alignment while maintaining human judgment.

Prerequisites

- Foundations of AI (ICP-FAI) or equivalent generative AI knowledge
- Agile Product Ownership (ICP-APO) or equivalent product knowledge

Target Audience

Product managers, product owners, delivery leads, and business analysts.

What You Will Learn

By the end of this course, participants will:

- Describe key planning elements and AI's role in enhancing them
- Generate AI-supported roadmaps and backlogs
- Design release plans balancing customer needs and constraints
- Critique AI outputs and refine recommendations
- Address ethical implications and biases in planning decisions
