Mastering Adobe Photoshop Training

Duration: **2 Day**

BILGINC IT Academy
info@bilginc.com
bilginc.com

This two-day course covers all the key features of Adobe Photoshop that you are likely to need so that you can get started editing and manipulating digital imagery using this powerful piece of software.

The course is suitable for anyone who needs to use Photoshop to create and editing images, whether you are in a marketing or communications department or even a photographer.

This course goes from the basics of using Photoshop, through to sophisticated techniques and tools for retouching, using layers, masking, and outputting digital files from the application.

Prerequisites

Delegates do not need any experience of digital imaging or photography as anything that is required will be covered by the course.

However, all delegates should have basic computer skills and know how to launch applications, browse to locate files, and have good keyboard and mouse skills.

What You Will Learn

- Navigate the Photoshop environment
- Understand image size, resolution, and colour modes
- Create, modify, and work with selections
- Work with layers and layer groups
- Use layer masks and clipping masks
- Apply adjustments using adjustment layers
- Use common image retouching tools
- Output images from Photoshop
