bilginc.com

Overview

This zSecure class is designed, written and presented by RACF & zSecure specialists. This is a hands-on course, in which attendees will learn to perform the frequently used administrative functions, standard reports, and verification functions of IBM Security zSecure Admin.

This course is also available 'on demand' (minimum 2 students) for public presentations or for one-company, presentations, presented on-site or over the Internet via the Virtual Classroom Environment service.

Prerequisites

Attendees should have thorough working knowledge of RACF or have attended the RSM course **RACF Administration & Auditing**.

What You Will Learn

- display RACF users and user information from the ISPF zSecure Admin panels
- manage RACF groups interactively and create printed reports
- administer RACF dataset and general resource profiles and examine access lists
- create textual reports on RACF users, groups, data sets, and general resources
- review and maintain RACF and Class Descriptor Table (CDT) options
- define and maintain input files to control your IBM Security zSecure Admin session
- use the reports provided with IBM Security zSecure Admin
- analyze RACF profiles containing segments
- review the installation's RACF control tables and analyze the group structure in the installation
- create reports on the RACF database and resolve inconsistencies
- customize installation data, compare users, queue commands, and run commands using CKGRACF.
