Develop the expertise necessary for long-term transformation with the Advanced SAFe Practice Consultant (ASPC) certification path.

The Advanced SPC Certification Path is an innovative, modular learning journey designed for experienced SPCs looking to deepen their Agile expertise and advance their careers. Through hands-on practice, learners will gain actionable skills and job-ready expertise.

With a focus on sustainable transformation, this path equips participants to engage leadership effectively, demonstrate value through metrics, and drive continuous improvement in their organisation.

Supported by expert guidance and peer collaboration in a dynamic Learning Lab, learners move beyond theory to apply proven Agile principles in real-world settings.

Prerequisites

Learners must hold a current SPC 6.0 certification status to obtain the Advanced SPC Certification

What You Will Learn

- Engage Leadership: Leverage metrics and reports to highlight the value of transformation.
- Foster Innovation: Mitigate risks to promote organizational creativity and growth.
- Cultivate a Learning Culture: Implement continuous improvement practices across the organization.
- Learn from Case Studies: Draw valuable insights from real-world examples and experiences.
- Develop Practical Skills: Master the creation of effective OKRs, execute transformation strategies, excel in Lean Portfolio Management, and drive relentless improvement.
- Hands-On Application: Gain experience by applying your skills in a guided, real-world Learning Lab environment.
