# SAFe DevOps® Training

BILGINÇ IT Academy
info@bilginc.com
bilginc.com

Duration: **2 Day**

In today's fast-paced digital landscape, organizations must deliver **valuable technology solutions at the speed of business**.
The **SAFe® DevOps course** equips both technical and non-technical professionals with a **shared DevOps mindset** to improve collaboration, flow, and business value delivery.

This **2-day interactive course**, based on the **Scaled Agile Framework (SAFe)**, teaches participants how to map their **Continuous Delivery Pipeline (CDP)**, identify bottlenecks, and design an actionable DevOps transformation plan.

## Why Choose SAFe DevOps?

- Globally recognized SAFe certification
- Hands-on, cross-functional collaboration
- Real-world mapping of end-to-end value delivery
- Foundation for scaling DevOps across your enterprise

**Bilginç IT Academy** is an officially **Accredited Training Organisation (ATO)** by **PeopleCert**, the global leader in professional certification and exam delivery.
As an authorized PeopleCert partner, we deliver accredited training and official certification exams for **ITIL®, PRINCE2®, DevOps, and other PeopleCert-certified programs**, ensuring our learners receive globally recognized credentials with the most up-to-date curriculum.

Visit our official PeopleCert partner page here:Bilginç IT Academy – PeopleCert Official Partner

**Important Information:**
This course is an official program accredited by PeopleCert and is offered **only together with the corresponding certification exam**. The course fee **includes the exam fee**.
Participants can take the certification exam online through PeopleCert's examination system and earn an internationally recognized certificate.
This practice is mandatory to ensure compliance with PeopleCert's quality standards and accreditation guidelines.

ITIL® is a registered trademark of the PeopleCert group. Used under licence from PeopleCert. All rights reserved.

## Prerequisites

There are around 3 hours of mostly video-led learning – supported by additional reading – that will be accessed through SAFe studio. An account will need to be set up for this, but all instructions and

support will be provided. This will be sent to all learners approximately 1 week prior to the course start date.

All are welcome to attend the course without prior knowledge.

## Who Should Attend

Ideal for:

- All members of an **Agile Release Train (ART)**
- Developers, Testers, and QA Managers
- Product Managers and Product Owners
- Architects, Infrastructure and System Engineers
- Scrum Masters, RTEs, and Agile Coaches
- Operations, InfoSec, and Release Managers

## What You Will Learn

By the end of this course, attendees will be able to:

- Explain how DevOps supports business goals.
- Apply the **CALMR** (Culture, Automation, Lean Flow, Measurement, Recovery) approach.
- Implement **Continuous Exploration, Integration, and Deployment**.
- Build quality in through **Continuous Testing and Security**.
- Use **Value Stream Mapping** to improve flow and detect bottlenecks.
- Design and execute a **multi-phase DevOps transformation plan**.
- Collaborate across technical and business roles to maximize value delivery.
