Cloud Sparks Gemini Enterprise Essentials for Business and Power Users Training

Duration: **3 Day**

BILGINC IT Academy
info@bilginc.com
bilginc.com

This course equips business professionals with essential skills for leveraging Gemini Enterprise. It covers the basics of generative AI, effective prompting, and using Gemini Enterprise for enterprise-wide search and assistance. The training also details Gemini Notebook's features for gaining insights from proprietary documents and explains different AI agent types, including the Deep Research Agent, with examples of creating no-code agents using Agent Designer.

Prerequisites

There are no specific prerequisites for this course.

Target audience

This course is designed for Gemini Enterprise business users who want to understand the full set of features of the product, as well as Gemini Enterprise power users who will leverage Agent Designer to build their own agents.

What You Will Learn

By the end of this course, learners will be able to:

- Explain the basics of generative AI and list possible use cases
- Identify the differences between keyword search and prompting, and list the benefits of prompting
- Describe Gemini Enterprise’s main capabilities for using enterprise-wide search and assistant features
- Explain how to use the Deep Research Agent
- Describe Gemini Notebook's main features for getting additional insights around proprietary documents
- Differentiate between prompting the Gemini Enterprise assistant and an agent
- Identify different agent types available for Gemini Enterprise
- Describe options for building an agent with Agent Designer
- Explore use cases for building an agent with Agent Designer
