HPE Nonstop Compute System Fundamentals Training

Duration: **4 Day**

BILGINÇ IT Academy
info@bilginc.com
bilginc.com

This course is an extensive introduction to HP NonStop servers and to the system software that makes them reliable, scalable, open, and fast. It also covers NonStop server application, database, networking, security, and operations environment topics and is the foundation and prerequisite for most other NonStop courses. The four-day course is 60 percent lecture and 40 percent hands-on labs using HP servers.

Prerequisites

Knowledge of basic computer and IT concepts

Audience

- Application designers and developers
- System managers and network managers
- Data communications programmers
- Technical support personnel

What You Will Learn

- Understand the unique capabilities of HP NonStop servers
- Discuss the hardware and software architecture of
- Integrity NonStop servers and Integrity NonStop BladeSystem servers and understand how availability, data integrity, high performance, and flexibility are assured
- Learn the concepts and facilities for application development and management, database and system management, networking, and security
- Learn how to use the full capabilities of your system through hands-on lab exercises
