## Overview

**Design Thinking** is a creative, human-centered methodology that brings innovation and customer empathy into business problem-solving.
It applies the **design mindset** to identify real user needs and generate impactful, user-driven solutions.

This course prepares participants for the **A4Q Foundation Certificate in Design Thinking**, an internationally recognized qualification validating knowledge of the **Design Thinking process, techniques, and cultural application**.

The **A4Q Foundation Certificate in Design Thinking** empowers professionals to lead innovation through **empathy, creativity, and collaboration**.
Participants gain the confidence to facilitate design-led processes that deliver **impactful, customer-centric solutions** in any business context.

This course provides a **globally recognized credential** in design-driven innovation — essential for product, UX, and strategy professionals.

## Prerequisites

There are no formal prerequisites for this course.
However, prior exposure to **product development, UX/UI, or agile project management** is beneficial.

## Who Should Attend

- Product Owners and Managers
- Scrum Masters and Agile Practitioners
- UX / UI Designers
- Software Engineers and Developers
- Service Designers
- Innovation Strategists
- Business Analysts
