Duration: **5 Day**

Overview

This five-day course provides IT professionals with comprehensive training on administering Citrix NetScaler Gateway 14.x. Participants will learn to implement, configure, and manage NetScaler Gateway solutions to enable secure access to Citrix environments and other enterprise applications. Hands-on labs reinforce theoretical knowledge and practical skills.

Prerequisites

- Basic understanding of TCP/IP, HTTP, OSI model, and networking protocols.

Target audience

- IT administrators, engineers, and architects working with Citrix networking solutions.

What You Will Learn

- Configure and secure NetScaler Gateway.
- Implement authentication, authorisation, and session management.
- Integrate NetScaler Gateway with Citrix Virtual Apps and Desktops.
