Overview

Learn how to administer Jira.

Tracking issues is a critical component of your project management strategy. Jira provides a web based repository for creating, tracking, and reporting on feature requests, bugs reported, or managing your workflow. This hands-on course enables you to administer a Jira instance and “learn by doing”. The course focus is on exploring best practices and practical skills through hands-on activities.

You’ll also receive a copy of Jira Essentials - Fourth Edition by Patrick Li.

Who Should Attend?

Administrators who are new to Jira.

Prerequisites

You should have experience with the basic platform administration principles.

What You Will Learn

Join an engaging hands-on learning environment, where you’ll explore:

- Getting started with Jira Administration
- Groups vs Roles
- Project Resolution
- Schemes
- Jira as a Platform
- Workflows
- Custom Fields
- User Lifecycle
- Remote JIRA Access
- Migrating Data into Jira

This course has a 50% hands-on labs to 50% lecture ratio with engaging instruction, demos, group discussions, labs, and project work.
