Overview

The Salesforce Administration Fundamentals training is a comprehensive course designed for beginners who want to learn the role of a Salesforce Administrator. Over five days, participants gain hands-on experience configuring and customizing a Salesforce organization (org).

The course covers Salesforce architecture, user management, security settings, and system configuration. It also focuses on customization, automation, data management, and reporting, enabling learners to perform day-to-day administrative tasks effectively.

Prerequisites

Participants should have:

- Knowledge equivalent to the Trailhead course “Essentials for New Lightning Experience Administrators”
- Basic familiarity with Salesforce

Who Should Attend

This course is ideal for:

- Beginner Salesforce administrators
- Aspiring Salesforce System Administrators
- Trailblazers looking to expand their skills

What You Will Learn

By the end of this course, learners will be able to:

- Understand Salesforce fundamentals and user interface navigation
- Configure licensing, users, and security settings
- Apply security models using profiles and permission sets
- Customize objects, fields, and layouts
- Use automation tools to streamline business processes
- Manage data and create reports and dashboards
