Overview

The **AI Empowered SAFe® Scrum Master (SSM)** course provides a comprehensive understanding of the Scrum Master role within a SAFe enterprise and equips you with the skills to **lead Agile teams, facilitate events, and deliver business value effectively**.

This two-day certified training focuses on empowering Scrum Masters to guide Agile teams, facilitate key events such as iteration planning, team syncs, and retrospectives, and support teams in delivering value using SAFe Scrum and SAFe Kanban practices.

The course also introduces **servant leadership principles** to build high-performing and continuously improving teams. Additionally, it integrates **AI-powered tools and responsible AI frameworks** to enhance decision-making, protect sensitive data, and ensure compliance.

Prerequisites

- Basic understanding of Agile and Scrum
- Experience in team collaboration and leadership is recommended
