Overview

Business Process Modeling and Notation (BPMN) is a popular process modelling language used by many who work in the process modelling community. This course builds on the knowledge gained in QABPMN1 to provide an explanation of the rest of the BPMN process notation, based on the Analytic Level palette of this modelling language. An overview of how to model collaboration in BPMN is also included.

Prerequisites

QABPMNDL, or similar knowledge of the Descriptive Level of BPMN.

What You Will Learn

The learner will become familiar with Analytic Level palette of BPMN, and how to use it in models of business processes.
