Overview

Discover the benefits of Scrum as applied to product ownership in this two-day immersion into agile product management.

As we move through the disciplines promoted by Scrum you will gain a comprehensive understanding of agile product development methodology while specifically reviewing the behaviors expected of a Product Owner. While many of us may be accustomed to the practice of establishing value and priority across projects, the Product Owner needs to consider value and priority across the features of a single project.

After successfully completing this class, participants will be registered with the Scrum Alliance as Certified Scrum Product Owners (CSPO) and will have online access to the class training materials and any updates for one year. This course is also approved for 16 PDU's with the PMI.

This course is offered in partnership with Cprime Learning, a Scrum Alliance Registered Education Ally (REA).

Who Should Attend?

Technical professionals associated with the specification, design, development and testing of products will benefit from this two-day program. Some of the professionals this will benefit include:

- Product Managers/Business Analysts
- Functional/Operational Managers/Directors
- Project Sponsors
- IT Leadership (Managers/Directors/VPs/CIOs/CTOs)
- Anyone interested in learning the benefits of Scrum for Product Management

This class is suitable for those who are responsible for setting product direction on a Scrum project. While current Certified ScrumMasters are welcome to attend, this class should not be considered as a next step after taking the CSM Class, but instead should be viewed as an alternative to the CSM Class.

Please note: This course has an Attendance and Virtual Camera Requirement

- Attendance is required throughout the duration of this course. Instructors will verify each student's attendance and participation to ensure course completion.
- Webcam usage is required by all students

What You Will Learn

In this Certified Scrum Product Owner (CSPO) Workshop Course, you will:

- Understand the fundamentals, terminology, practices and principles of the role of the Certified Scrum Product Owner
- Demonstrate your knowledge of the role of the Scrum Product Owner to advance your career.
