Overview

This 1-day DAMA DMBOK Data Management Specialist course addresses all required disciplines required for the Metadata Management (MD) specialist exam by the international standard, DAMA Body of Knowledge (DMBOK2) and is aimed at individuals interested in developing concrete professionalism in the field of Data Management with a specialization in Metadata Management.

This course provides a solid foundation of the different information disciplines across the complete Metadata Management spectrum.

The MD specialist course explores the essential concepts and techniques for effectively managing metadata within organizations. This includes understanding the role of metadata in data governance, data integration, and data quality management processes. You'll delve into strategies for capturing, storing, and cataloging metadata to facilitate data discovery, lineage, and understanding.

Prerequisites

CDMP-DMF, DAMA DMBOK Data Management Fundamentals Recommended prerequisites:

- CDMP-DMF - DAMA DMBoK Data Management Fundamentals
