

iPad and iPhone deployment strategies

Learn via: **Classroom**

Duration: **1 Day**

Overview

iOS Deployment Strategies is a 1-day workshop course that provides organisations with the knowledge to plan the deployment of iPads and iPhones.

Who Should Attend

This course is for technical coordinators and system administrators who are planning on rolling out iPads and iPhones.

What You Will Learn

Delegates will learn how to plan the deployment of iPads and iPhones and the requirements to implement them in to a corporate network.

Outline

Part 1

Learn all about Apple's Device Enrollment Program and Volume Purchase Program and how they aid in the deployment of iOS devices.

Part 2

Wi-Fi and the importance of ensuring the current wi-fi infrastructure can support iPads and iPhones.

Part 3

How to put it all together and develop a box to user strategy for the roll out of iPads and iPhones.
