

Adobe Photoshop Elements

Learn via: **Classroom**

Duration: **1 Day**

Overview

This one-day course covers some of the basic and more commonly used features of Adobe Photoshop Elements so that attendees can navigate the software and use the provided tools to work with digital images.

This course is suitable for anyone using Adobe Photoshop Elements 13, 14 or 15.

Prerequisites

Delegates do not need any experience of digital imaging or photography as anything that is required will be covered by the course.

However, all delegates should have basic computer skills and know how to launch applications, browse to locate files and have good keyboard and mouse skills.

What You Will Learn

- Navigate their way around the Photoshop Elements and image environment
- Understand image size and resolution
- Be able to work in Elements' Quick, Guided and Expert modes
- Create and modify selections
- Work with layers, layer groups, styles and blending modes
- Use common image retouching tools and filters
- Output images from Photoshop Elements
