

Identity Manager 4.7 Administration (3167)

Learn via: **Classroom**

Duration: **4 Days**

Overview

Overview

The purpose of this course is to enable administrators to perform basic administrative tasks using Identity Manager 4.7. The course provides instruction and hands-on experience with tasks such as installing the NetIQ Identity Manager Engine and drivers, eDirectory rights, and drivers, and administering Identity Manager

In addition, students learn how to use analyzer, manage policies and filters, use DS Trace to track driver content flow, and implement Identity Manager password synchronization.

Prerequisites
