Overview

This session equips participants with core capabilities that help them perform basic management of HPE Synergy. An architectural overview ensures a high-level understanding of the associated equipment, including the HPE Synergy frame, network fabric, compute and storage modules. Participants use HPE Synergy Composer powered by HPE OneView to perform basic management of the existing HPE Synergy environment. During the labs portion of the training, students learn how to make changes to the existing environment and manage server profiles.

Prerequisites

There are no prerequisites to this class, although basic understanding of Virtual Connect and OneView are beneficial.
