Jamf 200 Training

BİLGİNÇ IT Academy
info@bilginc.com
bilginc.com

Duration: **4 Day**

***Please note there is an approval process for each JAMF course. the delegate does not have a confirmed place on the course until they have been approved. Therefore we can't guarantee that delegates will be able to book onto their prefered date as this is subject to approval.**

The Jamf 200 Course offers a core understanding of Jamf Pro, as well as an enterprise-focused examination of the macOS and iOS platforms.

Our class is a hands-on, example-based environment and the best way to learn Jamf Pro.

What's Included:

- Four days (9 AM - 5 PM each day) of lab-style interaction.
- Proctored certification exam during the afternoon of the fourth day.
- All hardware and software required for the course.
- Printed course materials.
- Jamf Certified Tech badge on your Jamf Nation profile (upon successfully completing the exam with a passing score).

Prerequisites

- Abundant hands-on experience with macOS and iOS.
- Completion of the Jamf 100 Course is strongly recommended.

Duration: **4 Day**

Training Outline

Topics:

- Introduction to the Jamf Pro server.
- Building and managing content (.pkg, .mpkg, and .dmg packages) for deployment to macOS devices.
- Enrolling macOS and iOS devices using automated MDM enrollment.
- Setup and configuration of macOS and iOS devices.
- Configuring the user environment (Configuration Profiles, .plist).
- Security for macOS and iOS devices.
- Purchasing and distributing App Store apps using Apple Business Manager or Apple School Manager.
- Scripting overview (Bash).
- Initial setup and refreshing/reimaging macOS and iOS devices.
- Ownership and permissions (POSIX, ACE/ACL) on macOS devices.

Daily Schedule - 9:00 am — 5:00 pm

Day 1 – Settings; Enrolment and Groups
Day 2 – Deployment
Day 3 – Deployment; Settings
Day 4 – OS Updates and Deployment; Course Review; Exam Preparation; Jamf Certified Tech Exam

Customer requirements:

• A reliable internet connection—capable of receiving 10.0 Mbps and sending 5.0 Mbps

• A test (non-production) Mac with any version of macOS Sonoma 14 and a functioning camera

• A test (non-production) iPad with any version of iPadOS 17

• Optional, but highly encouraged: An additional computer (production) or external monitor

Note:

“Non-production” means that the device and computer can be erased before and after the course, supervised, and used for full Jamf Pro enrolment testing in class.

The non-production device and computer must meet the following conditions:

• Not be currently enrolled in any MDM server or in the scope of an Automated Device

Enrollment profile

• Unassigned in or unaffiliated with Apple Business Manager or Apple School Manager If you do not have an iPad, you can use any non-production iOS device that meets the conditions and customer requirements listed above. macOS virtual machines will not work as a substitute for a physical non-production computer
