The **Exploring Business Processes in SAP S/4HANA Cloud Private Edition, Transportation Management (S48600)** training course provides a comprehensive introduction to the core business processes and system capabilities of SAP Transportation Management (SAP TM).

The course is designed to help professionals prepare for the **blueprinting phase of an SAP Transportation Management implementation** or develop the knowledge required to work effectively with the system as a business user.

Participants will gain an understanding of key business transactions and system functionalities, enabling them to design transportation processes that meet their organisation's specific requirements.

Throughout the training, participants will explore how SAP Transportation Management supports **order management, transportation planning, subcontracting, transportation execution, charge calculation and settlement**.

Who Should Attend

This course is intended for professionals who want to develop their understanding of **SAP Transportation Management business processes**, prepare for implementation projects or improve their knowledge of the system, including:

- Business users
- Consultants

What You Will Learn

Upon completing this course, participants will be able to:

- Understand the core functionalities and business processes of **SAP Transportation Management**.
- Identify the system capabilities required to design transportation processes aligned with organisational needs.
- Understand order management and transportation planning processes.
- Explore how SAP TM supports subcontracting and transportation execution.
- Understand how the system facilitates **transportation charge calculation and settlement**.
