

Introduction to Requirements Management using IBM Rational DOORS 9.6.x

Learn via: **Classroom / Virtual Classroom / Online**

Duration: **1 Day**

<https://bilginc.com/en/training/introduction-to-requirements-management-using-ibm-rational-doors-9-6-x-21-training/>

Overview

This course teaches analysts and engineers how to define, elaborate, organise, and manage textual and graphical requirements and requirements-related information in IBM Rational DOORS.

The lab environment is based on IBM Rational DOORS 9.6.1. For people using earlier versions, the differences can be highlighted.

Prerequisites

There are no pre-requisites for this course.

Who Should Attend

- Business Analysts
- Systems Engineers
- Software Engineers
- Requirements Engineers
- Requirements Managers
- Requirements Team Leaders

What You Will Learn

After completing this course, you should be able to use IBM Rational DOORS to:

- Navigate database and project structures
- Create and populate folders and modules
- Modify existing data
- Filter and review existing data
- Create relationships
- Report on and traverse relationships
- Create and edit requirements documents, text and graphical artefacts
- Create, manage, and view traceability relationships
- Manage requirements throughout a project lifecycle

Outline

- View information
- Edit information
- Structure information
- Get Word documents into Rational DOORS
- Generate requirements documents
- Use attributes to capture information about requirements
- Search mechanisms
- Manipulate the display
- Create and analyze traceability
- Insert information in other formats
