Mastering Power Automate AI Builder

Learn via: **Classroom / Virtual Classroom / Online**

Duration: **1 Day**

https://bilginc.com/en/training/mastering-power-automate-ai-builder-4428-training/

Overview

This course is a technical introduction to using Power Automate AI builder. The course is targeted at more technical power users and IT staff and will teach them the skills required to set up Power Automate AI solutions and then integrate them with Power Automate and Power Apps.

Prerequisites

Students should already be familiar with Office 365 and have good Power Automate skills. Attendance of the QA course Mastering Power Automate is the recommended way for new students to gain appropriate experience. It is also recommended that students have a familiarity with Power Apps to a level where they can create their own apps.

Outline
