Learn via: **Classroom**

Duration: **1 Day**

https://bilginc.com/en/training/red-hat-certified-jboss-administrator-exam-963-training/

Overview

A Red Hat® Certified JBoss® Administrator (RHCJA) possesses the skills, knowledge, and abilities required to install, configure, and manage Red Hat JBoss Enterprise Application Platform and to deploy and manage applications on that platform.

Prove your skills and knowledge

An RHCJA is capable of performing the following tasks:

- Installing and running an instance of Red Hat JBoss Enterprise Application Platform
- Configuring multiple instances
- Configuring JBoss web connectors
- Deploying applications
- Configuring web properties for deployed applications
- Configuring logging
- Configuring access control
- Configuring Java™ Virtual Machine (JVM) properties
- Removing unnecessary services
- Configuring XA and non-XA data sources
- Configuring a database management system (DBMS) security domain
- Configuring a cluster using Transmission Control Protocol (TCP)
- Creating a clustered Java Message Service (JMS) queue
- Configuring load balancing and failover
