Introduction to MS 365 Loop Training

Duration: **1 Day**

BILGINÇ IT Academy
info@bilginc.com
bilginc.com

The Introduction to Microsoft 365 Loop course is designed to help learners understand how Loop supports modern teamwork and real-time collaboration. The training focuses on organizing information effectively and enabling teams to work together seamlessly.

Participants will learn how to create workspaces and pages, build components, and integrate Loop with Microsoft 365 tools such as Teams, Outlook, Planner, and OneNote. The course uses simple explanations and practical examples to demonstrate how Loop improves productivity in everyday work.

Prerequisites

Participants should have:

- Basic familiarity with Microsoft 365
- Simple experience using tools like Outlook or Teams

No advanced technical skills are required.

Who Should Attend

This course is suitable for:

- Business users
- Project managers
- Administrators
- Beginners using Microsoft Loop
- Anyone looking to improve collaboration and team planning

What You Will Learn

By the end of this course, learners will be able to:

- Understand the purpose of Microsoft Loop and its role in collaboration
- Create and organize workspaces and pages
- Use Loop components in real time
- Apply Loop in real-world scenarios
- Integrate Loop with Teams, Outlook, Planner, and OneNote
- Follow best practices for sharing and organizing work
