bilginc.com

The **Processes in SAP Extended Warehouse Management (SAP EWM) Training** is designed to help participants understand advanced warehouse management processes and effectively use the core functionalities of SAP EWM.

The course covers warehouse organizational structures, master data management, goods receipt and shipping processes, warehouse monitoring, and warehouse operations performed using mobile devices.

Participants also explore advanced warehouse management capabilities, including **resource optimization, replenishment, physical inventory, wave management, and cross docking**.

In addition, the training covers the execution of end-to-end warehouse processes within SAP EWM, from inbound goods receipt to outbound shipping.

Prerequisites

Essential Prerequisites
