NonStop Transaction Management Facility Operations and Management Training

BILGINC IT Academy
info@bilginc.com
bilginc.com

Duration: **4 Day**

This course provides an intensive introduction to the NonStop Transaction Management Facility (TMF). You will learn terminology, components, and how NonStop TMF provides database protection. You will participate in lab exercises covering media management, audit and online dumps, volume and file recovery, catalog manipulation, configuration, routine operations, and how to prepare for orderly recovery. This four-day course is 60 percent lecture and 40 percent hands-on labs using HP servers.

Prerequisites

- NonStop S-series Server Administration I and NonStop S-series Server Administration II

or

- NonStop NS-series Server Administration I and NonStop NS-series Server Administration II

or

- Concepts and Facilities for NonStop Systems

and

- System management experience on NonStop K-series, S-series, or NS-series servers

Audience

- Database administrators
- System managers
- System operators
- Technical support analysts

NonStop Transaction Management Facility Operations and Management Training

Duration: **4 Day**

What You Will Learn

- Recognize which system and software components are necessary for NonStop TMF to provide both minimum and full protection functions
- Plan, write, and execute a NonStop TMF configuration with and without file recovery
- Choose the appropriate values for the NonStop TMF configuration attributes based upon your particular needs
- Use the appropriate TMFCOM commands to perform routine maintenance on NonStop TMF objects

Benefits to you

- Learn how to use the appropriate TMFCOM commands to perform monitoring and configuration activities and routine maintenance on NonStop TMF objects
- Improve operational efficiencies by gaining valuable hands-on experience running and configuring TMF
- Learn how to recover from accidental or intentional database modification or deletion by enabling your applications to use NonStop TMF software
