Scrum Alliance AI for Scrum Masters Micro-credential Training

Duration: **4 Day**

BILGINC IT Academy
info@bilginc.com
bilginc.com

This course empowers Scrum Masters and agile practitioners to leverage AI tools and techniques to improve team facilitation, decision making, and delivery efficiency. Through interactive sessions, participants will explore prompt engineering, data analysis, AI driven planning, and ethical considerations. The programme culminates in earning a lifetime digital micro credential from Scrum Alliance.

Prerequisites

There are no formal prerequisites are required for this course. Familiarity with Scrum practices and agile mindsets recommended for deeper application.

Target audience

This course is designed for:

- Scrum Masters and agile coaches
- Project and product managers working in agile teams
- Delivery team members interested in AI augmented practices
- Agile leaders seeking to enhance team performance with AI

What You Will Learn

By the end of this course, learners will be able to:

- Understand how AI can support Scrum events and team collaboration
- Apply prompt engineering to generate meaningful outputs during agile ceremonies
- Use AI driven data analysis for forecasting and team health metrics
- Facilitate retrospectives and strategic planning using AI insights
- Explore ethical considerations and appropriate AI tool selection
- Select and integrate AI platforms (e.g., ChatGPT, Copilot) into Scrum workflows
