bilginc.com

Wireshark is a free network protocol analyser. This hands-on course provides a starting point for troubleshooting networks using Wireshark. The course concentrates on the Wireshark product and students will gain from the most from this course only if they already have a sound knowledge of the TCP/IP protocols.

Prerequisites

There are no formal prerequisite courses, just a good knowledge of how IP works.

A good suggested course would be TCP/IP foundation for engineers

What You Will Learn

By the end of the course delegates will be able to:

- Download and install Wireshark.
- Capture and analyse packets with Wireshark.
- Configure capture and display filters.
- Customise Wireshark.
- Troubleshoot networks using Wireshark.
