Overview

ISACA's Cybersecurity Audit Certificate Program provides audit/assurance professionals with the knowledge needed to excel in cybersecurity audits. It provides security professionals with an understanding of the audit process, and IT risk professionals with an understanding of cyber-related risk and mitigating controls.

The Cybersecurity Audit Certificate is a comprehensive course designed to help individuals prepare for the Cybersecurity Audit Certificate exam and to understand risk and implement controls to better protect against cyber threats.

The Cybersecurity Audit Certificate exam and manual are organised within four high-level domains:

Cybersecurity and Audit's Role

Cybersecurity Governance

Cybersecurity Operations

Cybersecurity Technology Topics

These domains are the result of extensive research and feedback from subject matter experts from around the world.

Prerequisites

You do not need any prerequisites for this accelerated course. However, ISACA recommends that you have a basic understanding of cyber security concepts and previous experience within the industry.
