Overview

This 1-day DAMA DMBOK Data Management Specialist course addresses all required disciplines required for the Data Quality (DQ) specialist exam by the international standard, DAMA Body of Knowledge (DMBOK2) and is aimed at individuals interested in developing concrete professionalism in the field of Data Management with a specialization in Data Quality.

This course provides a solid foundation of the different information disciplines across the complete Data Quality spectrum.

The DQ specialist course explores the essential concepts and techniques for ensuring data accuracy, consistency, and completeness. This includes understanding data profiling methodologies to assess data quality issues and anomalies. You'll delve into strategies for data cleansing, deduplication, and standardization to improve data quality. By the end, you'll be equipped with the knowledge and skills to establish robust data quality processes and metrics within your organization.

Prerequisites

CDMP-DMF, DAMA DMBOK Data Management Fundamentals Recommended prerequisites:

- CDMP-DMF - DAMA DMBoK Data Management Fundamentals

What You Will Learn

- Grasping the core concepts and principles of data quality, including accuracy, completeness, consistency, and timeliness.
- Learning how to conduct data profiling to assess the quality of datasets and identify anomalies, inconsistencies, and errors.
- Mastering various data cleansing techniques, such as deduplication, standardization, and validation, to improve data quality.
- Developing skills in establishing data quality processes, policies, and metrics to monitor and measure data quality over time.
