Overview

This course introduces participants to the essential skills needed to create and edit documents in Microsoft Word. Learners will work with text and paragraph formatting, tables and lists, graphics and layout options, and the tools required to review and prepare documents for printing.

Electronic document creation is now a routine part of most professional roles. Microsoft Word provides a practical environment for producing clear, structured, and professional-looking documents for a wide range of everyday and business purposes.

Throughout the course, participants become familiar with the Word interface, work with document files and text, apply formatting, create simple tables, add visual elements, and prepare finished documents for print or distribution.

Prerequisites

Participants should be comfortable using a computer, mouse, and keyboard.

Previous experience with the following is useful but not essential:

- Opening and saving files,
- Using Cut, Copy, and Paste,
- Performing basic file operations within Windows.

Who Should Attend

This course is intended for users who are new to Microsoft Word or who want to develop a more structured understanding of its essential features.

It is particularly suitable for:

- Users who need to create and edit basic documents,
- Learners who want to develop text and paragraph formatting skills,
- Anyone who needs to create simple tables and lists,
- Professionals who want to improve the visual presentation of documents,
- Users who need to understand basic proofreading and print preparation techniques.

The course is suitable for users of Microsoft Word 2007, 2010, 2013, 2016, 2019, and Microsoft 365.
