This live 60-minute webinar is designed to help you explore some of the functionality of Microsoft 365 Copilot and to show you how it could benefit you in your normal working day.

Watch to discover how to get more done with less effort using Microsoft 365 Copilot. The webinar introduces you to your AI-powered assistant, designed to help you write, summarise, brainstorm and automate everyday tasks.

Whether you're new to Copilot or already exploring what it can do, you'll learn how to use Copilot within the Microsoft 365 apps, and see real-world examples in action. This session is ideal for anyone looking to boost productivity, improve communication or simply work smarter.

NOTE: Each webinar is 60 minutes long with the option to deliver up to four events over one day.

Prerequisites

There are no prerequisites to attend this webinar. However, familiarity with the core Microsoft 365 apps would be beneficial.
