Root Cause Analysis Training

BILGINC IT Academy
info@bilginc.com
bilginc.com

Duration: **1 Day**

Organizations often spend significant time addressing symptoms rather than eliminating the underlying causes of recurring issues. Effective Root Cause Analysis (RCA) helps teams move beyond short-term fixes and develop sustainable solutions that drive measurable business improvements.

This practical workshop provides participants with proven frameworks, analytical tools, and collaborative techniques for identifying root causes, evaluating improvement opportunities, and implementing effective corrective actions.

Through real-world examples and hands-on exercises, learners gain experience using methods such as the Five Whys, Pareto Analysis, Fishbone Diagrams, Gap Analysis, and other structured problem-solving tools.

By the end of the course, participants will be able to transform analysis into actionable recommendations and improvement initiatives.

Who Should Attend

This course is designed for:

- Team leaders and supervisors
- Business analysts
- Process improvement professionals
- Project managers
- Quality assurance specialists
- Operations managers
- Customer support and service leaders
- Engineers and technical professionals
- Change management practitioners
- Anyone seeking to strengthen analytical thinking and structured problem-solving skills

What You Will Learn

Upon completion of the workshop, participants will be able to:

- Define business problems and opportunities using structured frameworks
- Develop requirements using SMART criteria
- Create effective situation statements
- Apply Pareto Analysis to prioritize issues
- Use the Five Whys technique to uncover root causes
- Build and interpret Fishbone (Ishikawa) Diagrams
- Analyze complex relationships using Interrelationship Diagrams
- Conduct Gap Analysis to identify improvement opportunities
- Evaluate solution alternatives through feasibility and cost-benefit analysis
- Facilitate collaborative problem-solving workshops
- Convert analytical findings into actionable implementation plans

Root Cause Analysis Training

Duration: **1 Day**

Training Outline

Introduction to Root Cause Analysis

- Fundamentals of RCA
- Why root causes matter
- Workshop objectives
- Overview of analytical tools and frameworks

Identifying Problems and Opportunities

Topics Covered

- Defining problems versus opportunities
- Understanding business needs
- Stakeholder interviews and data gathering
- SMART requirement development
- Writing effective situation statements

Assessing the Current State

Pareto Analysis

- Applying the 80/20 principle
- Prioritizing critical issues
- Identifying high-impact factors

Five Whys Methodology

- Step-by-step root cause discovery
- Common mistakes and best practices
- Digging beyond surface-level symptoms

Fishbone (Ishikawa) Diagrams

- Visualizing cause-and-effect relationships
- Categorizing contributing factors

Interrelationship Diagrams

- Mapping complex problem interactions
- Identifying primary drivers

Customer-Centric Problem Analysis

- Understanding customer impacts
- Integrating customer perspectives into RCA activities

Practical Workshop Activities

Facilitated Demonstration

BILGINC IT Academy
info@bilginc.com
bilginc.com

- Live Five Whys analysis example

Group Exercises

- Conducting root cause investigations
- Building Pareto Diagrams
- Creating Fishbone Diagrams
- Developing Interrelationship Diagrams

Presentation and Feedback

- Sharing findings
- Peer review discussions
- Instructor coaching and feedback

Defining the Future State

Gap Analysis

- Evaluating the current state
- Defining desired outcomes
- Identifying improvement opportunities

Capability Analysis

- Assessing organizational capabilities
- Identifying required changes
- Establishing performance targets

Evaluating Solution Options

Feasibility Studies

- Technical feasibility
- Operational feasibility
- Risk considerations

Weighted Decision Analysis

- Defining evaluation criteria
- Comparing alternatives
- Selecting optimal solutions

Cost-Benefit Analysis

- Financial evaluation techniques
- Measuring expected value
- Business impact assessment

Action Planning and Implementation

Turning Insights into Action

BİLGİNÇ IT Academy

info@bilginc.com

bilginc.com

- Creating implementation plans
- Assigning responsibilities
- Establishing timelines

Measuring Success

- KPI development
- Progress tracking
- Continuous improvement practices

Course Wrap-Up

- Open discussion and Q&A
- Review of key tools and concepts
- Recommendations for further development
