Overview

The **Product Cost Planning in SAP S/4HANA** course provides a comprehensive overview of how cost planning supports decision-making throughout the product life cycle.
Available as an instructor-led course or as**self-paced e-learning (S4F23E)** via the SAP Learning Hub, this training helps you understand how to perform and configure product cost planning processes efficiently.

Participants learn how to set up material cost estimates, work with quantity structures, and apply advanced valuation and costing methods to ensure accurate and transparent cost control across production and supply chain functions.

Prerequisites

Mandatory:

- Basic knowledge of**SAP S/4HANA Management Accounting (Controlling - CO)**.
- Familiarity with **Cost Element Accounting and Cost Center Accounting**.

Recommended:

- Experience with **SAP navigation** (SAP Fiori or SAP GUI).
- Prior completion of**S4F20 – Management Accounting in SAP S/4HANA** or equivalent practical experience.

Who Should Attend

Designed for professionals such as:
Application Consultants, Business Process Owners, Project Managers, Power Users, and Cost Controllers seeking expertise in **SAP S/4HANA Controlling (CO-PC)** processes.
