Overview

The course, Building your AI Center of Excellence on Google Cloud, is a strategic program designed to help organizations move from fragmented, siloed innovation to a structured, enterprise-wide AI strategy. It focuses on the creation of an AI Center of Excellence (CoE)—a cross-functional unit that centralizes expertise and governance to accelerate AI value.The curriculum is built around four foundational pillars: Strategy, Structure, Governance, and Scale.

Participants will learn through a combination of case studies and practical demonstrations of Google Cloud tools like Gemini Enterprise. By the end of the 3-hour session, leaders will have a strategic roadmap for building an AI CoE that aligns with their organizational maturity.

Prerequisites

We recommend that attendees of this course have:

- Familiarity with cloud concepts
- General understanding of organizational business strategy

Target Audience

This course is designed for:

- Business leaders
- C-suite executives such as CIOs and CDOs
- Strategic leads responsible for enterprise-wide AI transformation and governance

What You Will Learn

By the end of this course, learners will be able to:

- Construct a formal AI CoE charter that translates business strategy into a dual-track mandate
- Design a cross-functional CoE structure by selecting the appropriate operating model based on organizational maturity
- Apply governance playbooks to dual-track AI projects for safe and effective AI implementation
- Evaluate AI transformation success using a balanced KPI framework to roadmap the CoE's evolution
