Overview

Data is one of the most valuable assets within modern organizations. However, in order to unlock the full value of data, organizations must manage, protect, and govern their data effectively.

The **DAMA DMBoK Data Governance Specialist** course is based on the internationally recognized **DAMA Body of Knowledge (DMBOK2)** framework. It is designed for professionals who want to develop expertise in data governance and strengthen their understanding of modern data management practices.

During the course participants will:

- understand the principles of data governance
- explore core data management disciplines
- learn how to define policies and standards for data assets
- understand data quality, integrity, and security principles

This program provides a strong foundation for professionals pursuing careers in data governance.

Prerequisites

Participants are recommended to have knowledge in the following areas before attending the course.

Required prerequisite

- CDMP-DMF – DAMA DMBoK Data Management Fundamentals

Recommended prerequisites

- data management fundamentals
- data governance concepts
- enterprise data management practices

Having this background helps participants gain the maximum benefit from the course.
