Power BI Desktop Fundamentals Training

Duration: **1 Day**

BİLGİNÇ IT Academy
info@bilginc.com
bilginc.com

Power BI Desktop is part of Microsoft's powerful suite of tools for data analysis and visualization. This course provides a hands-on introduction to connecting, transforming, visualizing, and publishing data using Power BI Desktop.

Learners will explore how to connect to various data sources, use the**Query Editor** to shape data, create engaging reports with visuals, and publish dashboards to Power BI Service.

> Note: This course is **not suitable for new Microsoft Excel users**.

Prerequisites

Participants should have:

- Basic data literacy and familiarity with Excel or database concepts,
- Understanding of filtering, sorting, and chart creation,
- Optionally, remote desktop access (GoToMyPC) can be provided for those without software.

Who Should Attend

Designed for professionals who need to connect, process, and visualize data across all organizational levels:

- Business analysts and data professionals,
- Report builders and decision-makers,
- Microsoft Office users familiar with charts and tables.

What You Will Learn

By the end of the course, learners will be able to:

- Understand **Power BI Desktop concepts** and key features,
- Connect to multiple data sources,
- Apply common **query transformations** to shape data,
- Build **interactive visuals** and analytical dashboards,
- Publish reports and pin visuals to dashboards.

Training Outline

Power BI Desktop Fundamentals Training

Duration: **1 Day**

BILGINÇ IT Academy
info@bilginc.com
bilginc.com
