Overview

The **installation and update of SAP S/4HANA and SAP Business Suite systems** is a critical skill for SAP professionals. In this course, you will learn how to install and update SAP systems using the required tools across different operating systems and databases.

The training provides practical knowledge with real-world scenarios and hands-on guidance.

In this course, you will learn both **technical pre-installation and post-installation steps** required for SAP systems.

Hands-on examples include:

- Installing SAP S/4HANA Server with SAP HANA database
- Installing SAP Solution Manager systems
- Working on Linux and Windows environments
- Using SAP HANA DB and SAP MaxDB

After completing **ADM110**, you will also be capable of installing **SAP ECC and other SAP systems** on different platforms and databases.

Software Releases Covered

The course is based on the following SAP versions:

- SAP S/4HANA Server 2023
- SAP Solution Manager 7.2
  - AS ABAP 7.40
  - AS Java 7.50

Prerequisites

Essential

- SAPTEC
- ADM100

Recommended

- ADM325
