+90 212 282 7700

Duration: **1 Day**

Overview

This introductory course covers some of the basic and more commonly used features of Adobe Illustrator, so that delegates can navigate the software and use Illustrator's tools to create and work with vector graphics.

NOTE: This course is suitable for anyone using Illustrator CS5, CS6 or CC. If attending in a QA centre then the course will be delivered using Illustrator CS6.

Prerequisites

Delegates do not need any experience of using Adobe Illustrator as all required skills will be covered during the course. All delegates should have basic computer skills and know how to launch applications, navigate their computer and have good keyboard and mouse skills.

Dual monitor setup is required for when attending this course via the QA Attend from Anywhere delivery method.

What You Will Learn

- Create vector artwork using Illustrator
- Format paths using fills and colour
- Understand and use the Pen Tool
- Add type to designs
- Manage artwork using layers
- Output graphics in different file formats
