NetScaler ADC 14.x Advanced Features (Security and Management) Training

Duration: **5 Day**

BILGINC IT Academy
info@bilginc.com
bilginc.com

This five-day course is designed for IT professionals seeking to deepen their expertise in managing and securing Citrix NetScaler environments. It equips learners with advanced skills to configure and deploy the NetScaler Web Application Firewall, use Application Firewall and AAA for Application Traffic, and manage the NetScaler Console (ADM). Through hands-on labs, participants will learn to mitigate web-based threats, leverage authentication and authorisation controls, and monitor the NetScaler infrastructure for optimised security and performance.

Prerequisites

- Foundational knowledge of NetScaler ADC administration and traffic management
- Completion of CNS-225: Deploy and Manage NetScaler ADC with Traffic Management
- Completion of CNS-227: Deploy and Manage NetScaler ADC with Gateway

Target Audience
This course is ideal for experienced NetScaler administrators or engineers who will be deploying or managing advanced security features within NetScaler environments.

What You Will Learn

Upon completion of this course, learners will be able to:

- Configure the NetScaler Web Application Firewall, including setting policies, profiles, signatures, and custom error pages
- Mitigate diverse security threats using NetScaler's Web Application Firewall
- Employ advanced security features such as Bot Management, Rate Limiting, and HTTP Callout to enhance application protection
- Deploy AAA for Application Traffic with nFactor to manage user access control efficiently
- Utilise the NetScaler Console for comprehensive monitoring and management of NetScaler instances
