Overview

The **ISO 45001:2018 Lead Auditor Training Course** provides participants with the knowledge and skills required to perform **Occupational Health and Safety Management System (OH&S MS)** audits in accordance with international standards.

The adoption of an OH&S management system enables organizations to improve workplace health and safety, reduce risks, and promote a proactive safety culture.
This course develops your capability to assess and report on the**conformance and effectiveness** of processes based on ISO 45001, while enhancing overall safety performance.

You will gain practical auditing experience through structured activities designed to help you**plan, perform, report, and follow up** on audit findings effectively — in line with the**ISO 19011:2011 guidelines** for auditing management systems.

Key Benefits

Benefit	Description
Comprehensive Knowledge	Learn ISO 45001 and ISO 19011 auditing principles
Practical Skills	Gain real-world experience in audit planning and execution
Professional Growth	Strengthen your auditing credentials and compliance expertise
Continuous Improvement	Help your organization build a proactive safety culture
