Overview

The training is a globally recognized certification designed for individuals starting their careers in project management. This training equips participants with the fundamental knowledge and practical skills required to work effectively within project teams and manage projects confidently.

This highly interactive **3-day course** is aligned with the **PMI® Exam Content Outline (ECO)** and helps participants understand and apply project management best practices across multiple domains. It covers both traditional and agile methodologies and prepares learners to confidently approach the CAPM® exam.

This course meets the 23-hour education requirement for the CAPM® exam.

Prerequisites

CAPM® is designed for entry-level project management roles like project coordinator, associate and junior project manager, and project team members. The full list of prerequisites for undertaking the examination and the application process can be found atwww.pmi.org.

The pre-requisites for the CAPM® exam are:

- High-school diploma - and
- 23 hours of formal project management education

Learners who apply after course attendance will meet PMI's requirement for 23 hours of accredited project management training before being accepted for the exam.

Pre-Course Learning

Learners are provided with a QA Study Guide as well as interactive, online content which introduces the PMI processes, knowledge areas and process groups. The full list of bite-sized activities in your pre-course learning may take up to ten hours to complete. Completing your pre-course learning will ensure you get the most from the course and have the best chance of passing the examination.
