Overview

This {*training} is the official Scrum.org course that provides a comprehensive introduction to the Scrum framework, the principles of empiricism, and the responsibilities of the Scrum Master role.

Over two interactive days, participants explore the foundations of Scrum and Agile while applying concepts through practical exercises, collaborative discussions, and real-world case studies. The course focuses not only on understanding Scrum mechanics but also on developing the mindset required to support effective Agile teams.

The training includes one free attempt at the globally recognized Professional Scrum Master I (PSM I) certification assessment.

All courses are delivered by Scrum.org-approved instructors using the official curriculum to ensure a consistent and high-quality learning experience worldwide.

Prerequisites

This course is suitable for anyone working in or around Scrum Teams.

Participants are encouraged to:

- Read the Scrum Guide before attending
- Complete the Scrum Open Assessment
- Have prior exposure to Scrum Teams or foundational Scrum training

Who Should Attend

This course is ideal for:

- Aspiring and practicing Scrum Masters
- Software developers and engineers
- Product Owners
- Team leaders and project managers
- Agile practitioners
- Organizational leaders supporting Agile adoption
- Professionals seeking a deeper understanding of Scrum
